**CONFEDERATION
OF THE CZECH
AVIATION INDUSTRY**

CCAI

CCAI is a network of **Czech aviation manufacturers and institutions** involved in aero structures, aero engines, MRO, avionics, systems and complete aircraft and integrated aircraft components design, development, production and testing, production of aircraft interiors and production of composite and machined parts including surface treatment. CCAI reflects the **long-standing tradition** of the Czech aircraft manufacturing.

CCAI consists of **22 aviation manufacturers**. Other members include **4 universities and 2 other institutions** supporting aviation training, education and R&D to all its members. CCAI supports Czech **aviation competitiveness** through its programs focusing on human resources, qualifications & training and supply chain improvements and it has an **advisory role to the Council of Government** regarding structural changes in Czech education system.

CCAI Goals

1. **Increase competitiveness** of the Czech aviation industry;
2. **Extend cooperation** within CCAI, integrate capabilities and expertise;
3. **HR development and support** in aviation industry;
4. Contribute to **the harmonization of the business environment**.

CCAI Visions

We integrate Czech aviation industry and create **prestigious, recognized, dynamic, competitive and reliable business** for our clients. CCAI is recognized representative of Czech aviation industry and trustworthy partner for all related stakeholders. Priority of CCAI is an **increase of manufacturing, turnover, employment and export** in aviation industry.
